ENCRYPTED EMAIL

Encrypted email from CTP provides a comprehensive encryption solution to help you ensure your confidential communications are safe, secure, and comply with HIPAA regulations. In addition, all data resides in the United States, a statement that most competitors cannot make.

WHO SHOULD ENCRYPT EMAIL?

Healthcare organizations have ethical, fiduciary, and regulatory duties to ensure that their patient's personal information remains confidential. Encrypted Email from CTP provides the solution.

HOW DOES IT WORK?

- All email content and attachments automatically scanned to detect whether message warrants encryption before being sent, Examples include:
 - ▲ Emails with social security numbers
 - ▲ Emails with credit card numbers
 - ▲ Emails with patient information
 - ▲ Emails with legal case information
- Policies can be configured to encrypt and send, return to sender, or delete messages with non-secure content
- Reduces human error, minimizing the risk of security breaches
- No additional software or plug-ins required
- Includes full incoming and outgoing archiving

EEM \$429.95

12 month subscription with automatic renewal

*Cancellations require 30 day notice. HPTC client will be billed for the next month after receiving notice of cancellation.
